(54) Title: PRECLEANER ARRANGEMENT FOR USE IN AIR FILTRATION, METHOD OF OPERATION OF PRECLEANER AND AIR CLEANER COMPRISING THE PRECLEANER ARRANGEMENT

(57) Abstract: A precleaner (1) arrangement for use in separating a portion of entrained material in air from air entering an air cleaner, is provided. The precleaner arrangement includes a vane structure positioned to direct air into a circular or cyclonic pattern, to facilitate material separation. The vane structure (30) includes one or more adjustable air deflection vanes. Each adjustable air deflection vane is constructed: to have a first position under no air flow or low air flow rate conditions; and, to deflect to impart a more open, lower restriction under increased air flow rates. Preferred precleaner arrangement constructions, assemblies utilizing the precleaner arrangement and methods are described.
